

NEW AT NESPRESSO

# NEW ESSENZA COLOURS

Take a leap forward with the  
Essenza Spring Colours 2006

### Nespresso Essenza Manual

High pressure pump (19 bar),  
thermoblock heating element,  
compact brewing unit, manual volume control,  
functional handle allows for easy coffee  
preparation, ejection of used capsule on lifting  
the handle, collection container for used  
capsules, back-lit control button,  
removable water tank (0.9 l capacity):  
16.6 x 25.2 x 29.1 cm, weight: 3 kg

With the new Essenza collection, Nespresso gives the hip colours of the swinging 60s a new lease on life. The pastel hues of Lemon Zest and Retro Blue unmistakably recall the dynamic art deco stronghold Miami. The energizing, “lipstick-shades” of Spicy Orange and Fizzy Fuchsia were inspired by the elegant glamour of Capri. What they all have in common, however, is the pure joie de vivre that this successful Nespresso machine serves up with every cup.

Essenza Carrier-Travelcase designed to hold one machine.  
See Mail Order, page 79.

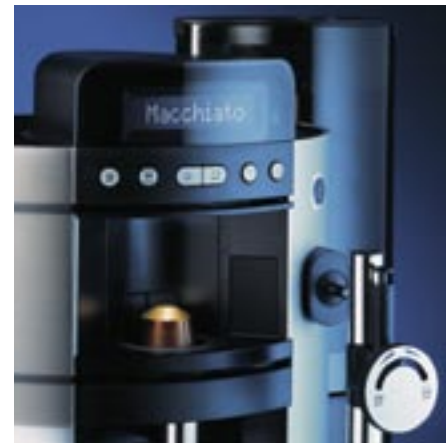

# PORSCHE DESIGN

## Nespresso Siemens by Porsche Design

Fully automatic Nespresso machine, one-touch Cappuccino/Latte Macchiato, patented milk whirl system, innovative two-piece drip pan for Latte Macchiato glasses, memory function for cup capacity, aluminium cup tray with pre-heating function, unique automatic capsule insertion system, user-friendly dialogue display programmable in 8 languages, automatic decalcification programme: 29.3 x 31.8 x 34.7 cm, weight: 7.5 kg

## Nespresso Siemens by Porsche Design

In collaboration with Siemens and Porsche Design, known for their exclusive deluxe accessories, Nespresso has developed a coffee machine with a purist hi-end design that brings together a timeless look, technical innovation, and exclusive coffee enjoyment on a supreme level.

With its functional, timeless and purist design and its technical innovations the new coffee machine is firmly rooted in the tradition of the Porsche Design philosophy. Thus the look of the Nespresso Siemens by Porsche Design is determined by the high-class brushed aluminium metal casing. The elegant inspection window that adjusts via motion sensor is both an eye-catcher and a functional detail. Hidden behind a cool and purist façade is hi-tech ingenuity. From the automatic capsule feed and ejection to the memory function for the capacity per cup this coffee machine boasts truly everything one might expect from high-class easy-handling. With the push of a button one can choose from six preparation variations: Espresso, Lungo, or a Caffe Latte, after all? The foaming nozzle is another elegant (and equally easy to handle) design element that is sure to delight the milk coffee aficionados among coffee connoisseurs. Not only does it allow a quick and simple preparation of Cappuccino and Latte Macchiato via one-touch function, the new milk whirl system always guarantees perfect foam. And, as every detail is essential for a perfect Espresso, the power-safe function makes it ecological and nature friendly by drastically decreasing power consumption while in "stand-by" mode. *Only available in Europe, from the 2nd half of 2006.*

# GEMINI

## Nespresso Gemini Generation

Innovative, double head brewing system that can prepare two cups of coffee at the same time, semi-automatic capsule insertion and ejection, multilingual digital operations screen, cup-warming plate, two removable, 3-litre water tanks, direct water connection possible, 3 programmable cup sizes: Ristretto, Espresso and Lungo, high speed hot water, convenient removable Cappuccino and Caffè Latte functions (Gemini CS 220) including one-touch milk foam, disposable straws and frothing nozzles: 56 x 40 x 37 cm, weight: 15-18 kg

## Nespresso Gemini Generation

With a new generation of coffee machines Nespresso makes use of innovative technology, accomplished design and outstanding service to set new standards in the high-end business-to-business coffee segment.

The quick and simple preparation of a cup of coffee plays an important part in places as diverse as offices, restaurants, hotels and even exclusive shops and boutiques. The Nespresso Gemini Generation was especially developed in order to meet the exacting demands of all these lines of business in the traditional high Nespresso quality – easy handling, supreme coffee quality and comprehensive service that guarantees flawless operation at all times are non-negotiable prerequisites. Thus the twin-head brewing system allows the simultaneous preparation of two cups with Ristretto, Espresso or Lungo being selected by the push of a button. Thanks to the easy to handle Cappuccino- and Caffè Latte-functions, perfect milk foam can be prepared in no more than 20 seconds, and just as easily. The look of the Nespresso Gemini is understated and stylish and meets superior design demands while being suitable for every kind of interior decoration. The typical modern Nespresso design gives this coffee machine an extraordinarily elegant look; even the removable 3-litre tanks were harmonically integrated. And to make sure that nobody ever needs to do without his Espresso, the B-2-B coffee capsules are delivered within 48 hours while technical support in case of emergency is guaranteed within a single day. **More under: [www.nespresso-pro.com](http://www.nespresso-pro.com)**
